

## Auto Meter Accessories

### Auto Meter Accessories

Electric Oil Pressure Sender, 100 psi Short Sweep .....	Part No. AM2242 .....	\$37.99
Electric Temperature Sender, Short Sweep .....	Part No. AM2258 .....	\$16.99
Electric Oil Pressure Sender, 100 psi Full Sweep .....	Part No. AM2246 .....	\$119.99
Electric Temperature Sender, Full Sweep .....	Part No. AM2252 .....	\$24.99
6 Foot Nylon Tubing Kit .....	Part No. AM3223 .....	\$11.99
12 Foot Nylon Tubing Kit .....	Part No. AM3226 .....	\$12.99
Fuel Pressure Isolator Kit .....	Part No. AM5282 .....	\$144.99

*See page 45 for a picture and complete description of the isolator kit.*

### Mounting Panels for Z-Series Gauges

1-Hole Mounting Panel, black .....	Part No. AM2236 .....	\$18.99
2-Hole Mounting Panel, black .....	Part No. AM2237 .....	\$19.99
3-Hole Mounting Panel, black .....	Part No. AM2238 .....	\$21.99

### Mounting Panels for 2 5/8" Auto Meter Gauges

1-Hole Mounting Panel, black .....	Part No. AM3231 .....	\$20.99
2-Hole Mounting Panel, black .....	Part No. AM3232 .....	\$20.99
3-Hole Mounting Panel, black .....	Part No. AM3233 .....	\$22.99

### Auto Meter Digital Pro-Shift System Shift Lights

The Auto Meter **Digital Pro-Shift System (DPSS) Lights** are independently operating, programmable shift lights with features like digital RPM readouts, super-bright LED shift lights, and peak RPM memory. The shift point is easily programmed with no "pills" required. The shift light brightness is adjustable, and the RPM readout can be turned off to minimize distractions. State-of-the-art, low-current circuitry makes these lights ideal for battery operation. Compatible with most 4 through 12 cylinder engines with 12 volt ignition systems (some distributorless systems require the DIS Adapter, sold separately).

**Level 1** features a digital RPM readout and a single-stage amber LED shift light.

**Level 2** features a digital RPM readout and a four-stage LED shift light that flashes and changes color to indicate an approaching shift point and late or missed shifts.

**Tube Shift Lights** have a pivoting housing that measures 5 1/4" long by 2 1/16" diameter (3 1/8" high with mounting bracket). The rotating bracket makes it easy to mount. Screw it to the top of your dash or clamp it on a rollcage tube or the steering column.

**Shift Light Gauges** mount in your dash panel just like a standard 2 1/16" diameter gauge.

### Auto Meter Pro-Lite Warning Lights

**Pro-Lite Warning Lights** If you have enough room above your dashboard and want a warning light that can't be ignored – this is it! The Pro-Lite is so bright, a translucent cover is provided to avoid blinding you at night. The large light has a matte black housing 5" long x 1.6" diameter. The Mini Lite measures 4 1/2" long x 5/8" diameter. A built-in mounting bracket makes it easy to mount to the top of the dash. These lights are the two-wire (non-grounded) type which can be used with single-terminal grounding type pressure switches. Supplied with a red lens. Different lens colors are sold below. Uses a standard No. 1076 or 1142 automotive replacement bulb. Both lights require a switch.

<b>Auto Meter Large Pro-Lite with red lens .....</b>	<b>Part No. AM3240 .....</b>	<b>\$54.99</b>
<b>Mini Pro-Lite Warning Light with red lens .....</b>	<b>Part No. AM3239 .....</b>	<b>\$53.99</b>
<b>Pro-Lite Pressure Switch, 15 psi, 1/8 NPT .....</b>	<b>Part No. AM3241 .....</b>	<b>\$24.99</b>
<b>Pro-Lite Pressure Switch, 30 psi, 1/8 NPT .....</b>	<b>Part No. AM3242 .....</b>	<b>\$24.99</b>
<b>Pro-Lite Pressure Switch, 50 psi, 1/8 NPT .....</b>	<b>Part No. AM3243 .....</b>	<b>\$25.99</b>
<b>Pro-Lite Temperature Switch, 220° (Off: 190°), 1/2 NPT ..</b>	<b>Part No. AM3247 .....</b>	<b>\$29.99</b>
<b>Pro-Lite Temperature Switch, 275° (Off: 245°), 1/2 NPT ..</b>	<b>Part No. AM3248 .....</b>	<b>\$27.99</b>
<b>Pro-Lite Blue Lens Kit for Large Pro-Lite .....</b>	<b>Part No. AM3250 .....</b>	<b>\$11.99</b>
<b>Pro-Lite Yellow Lens Kit for Large Pro-Lite .....</b>	<b>Part No. AM3251 .....</b>	<b>\$9.99</b>
<b>Pro-Lite Red Lens Kit for Large Pro-Lite .....</b>	<b>Part No. AM3252 .....</b>	<b>\$11.99</b>

GAUGES

Left: Auto Meter DPSS Black Tube Shift Light, Level 1 Part No. AM5343

Below: Auto Meter Sport-Comp DPSS Shift Light Gauge, Level 1 Part No. AM3387

### Auto Meter DPSS Shift Lights:

<b>Black DPSS Tube Shift Light, Level 1 .....</b>	<b>Part No. AM5343 .....</b>	<b>\$169.99</b>
<b>Sport-Comp DPSS Shift Light Gauge, Level 1 .....</b>	<b>Part No. AM3387 .....</b>	<b>\$189.99</b>
<b>Ultra-Lite DPSS Shift Light Gauge, Level 1 .....</b>	<b>Part No. AM4387 .....</b>	<b>\$189.99</b>
<b>C2 DPSS Shift Light Gauge, Level 2 .....</b>	<b>Part No. AM7188 .....</b>	<b>\$263.99</b>

**DIS Adapter for distributorless ignition systems .....** Part No. AM9117 .....

## Early Warning Devices

Our **Oil Pressure Switches** are rated for 100 psi operating pressure but can take momentary over-pressures of up to 500 psi. If your engine regularly exceeds 100 psi, the switch should be replaced each season for highest reliability. The pressure and temperature switches shown below are easy to install and connect to any of our warning lights. All switches are single-terminal grounding types. For highest reliability, we recommend that all pressure switches (and senders for electric oil pressure gauges) should be isolated from engine heat and vibration by using the combination bulkhead mount and 4AN adapter listed below. **Note:** Temperature switches and senders must be exposed to the fluid flow.

<b>20 psi Oil Pressure Switch, 1/8 NPT .....</b>	<b>Part No. LA4308 .....</b>	<b>\$15.99</b>
<b>20-40 psi Adjustable Oil Pressure Switch, 1/8 NPT .....</b>	<b>Part No. LA4808 .....</b>	<b>\$19.99</b>
<b>60 psi Oil Pressure Switch, 1/8 NPT .....</b>	<b>Part No. 1008 .....</b>	<b>\$59.99</b>
<b>2-7 psi Adjustable Fuel Pressure Switch, 1/8 NPT .....</b>	<b>Part No. 1064 .....</b>	<b>\$21.99</b>
<b>3 psi Heavy-Duty Coolant Pressure Switch, 1/8 NPT .....</b>	<b>Part No. LA43241 .....</b>	<b>\$18.99</b>

*A great way to detect loss of coolant. This switch will activate long before your temperature gauge registers a problem. In fact, temperature gauges often show a **lower** temperature when cooler air hits the sender.*

<b>1/8 NPT female to 4AN male Bulkhead Mount Adapter with nut .....</b>	<b>Part No. 3208-02-04S .....</b>	<b>\$9.49</b>
<b>225°F Temperature Switch, 1/4 NPT .....</b>	<b>Part No. 1005 .....</b>	<b>\$49.99</b>
<b>225°F Temperature Switch, 1/2 NPT .....</b>	<b>Part No. 1006 .....</b>	<b>\$44.99</b>
<b>250°F Temperature Switch, 1/2 NPT .....</b>	<b>Part No. 1007 .....</b>	<b>\$45.49</b>

**Note:** Temperature switches and temperature gauge senders will not read accurately unless they are directly exposed to the flow of the fluid. They cannot be mounted remotely in an area not exposed to constant fluid flow.

**Compact Warning Light** Includes a compact two-terminal (non-grounding) socket assembly, high-brightness 12 volt bulb, colored lens and instructions. Mounts in a 3/4 inch hole and requires 1.75 inch clearance behind the mounting panel. The bulb is replaceable from the front. Wire is not included. This is a compact unit for crowded instrument panels where space is at a premium. If you want a larger indicator, consider the Auto Meter Pro-Lite shown above.

<b>Compact Warning Light, Amber .....</b>	<b>Part No. 1401365 .....</b>	<b>\$8.29</b>
<b>Compact Warning Light, Blue .....</b>	<b>Part No. 1401366 .....</b>	<b>\$8.29</b>
<b>Compact Warning Light, White .....</b>	<b>Part No. 1401367 .....</b>	<b>\$8.29</b>
<b>Compact Warning Light, Red .....</b>	<b>Part No. 1401368 .....</b>	<b>\$8.29</b>
<b>Spare 12 volt high brightness bulb .....</b>	<b>Part No. 1031 .....</b>	<b>\$2.49</b>

See the Auto Meter Warning Light section above for more pressure and temperature switches.

Temperature Switch Part No. 1005

Compact Warning Light Available in Red, White, Blue or Amber
