

Chemicals and Dispensers

Formula V Tire and Rubber Treatment

Extends the life of your tires at a fraction of the cost of a new set of rubber. Works on all tires, from street to racing tires. Formula V is not just another rubber softener. It actually preserves the rubber and allows racing tires to get sticky when hot after many more heat cycles than would otherwise be possible. Apply 3 to 4 heavy coats per day for 3 days, then let dry for 2 days before racing. Protects trailer and RV tires against weathering and UV aging too!

Formula V Tire and Rubber Treatment, one gallon

Part No. 3340-001 \$43.99

Please note: This product can only be shipped via UPS Ground service within the 48 contiguous states.

RolloPrep Tire Prep Applicator

RolloPrep is a liquid applicator tool that combines roller, sprayer, and container into one easy to use, no mess unit. The device pumps liquid from a 32 ounce bottle via a trigger sprayer, where it is then routed to the inside of a roller. Originally developed for applying tire treatment products to auto and racing kart tires, RolloPrep has numerous other uses. As long as your liquid product can be sprayed thru the sprayer and rolled with the special velour roller, then RolloPrep is the answer for your liquid application needs.

RolloPrep Applicator Tool Part No. 9983-001 ... \$29.99

Replacement Roller Part No. 9983-002 \$7.99

Loctite® E-120HP Hysol Structural Epoxy and Dispensers

Above: Loctite E-120HP Hysol Epoxy, 200 ml Cartridge Part No. LT-29354

Below: Loctite Universal Dispensing Gun, 200/400ml Part No. 3337

Below: Loctite Dispensing Gun, 50ml Part No. LT-98472

Above: Loctite Mixing Nozzles, 50ml Part No. LT-98623

Loctite E-120HP Hysol Structural Epoxy An excellent epoxy for bonding the floor pan, firewall, and bulkheads of formula cars. E-120HP is an ultra-strength, aerospace grade epoxy adhesive with a 120 minute working time. Hysol is the latest generation of Loctite epoxy adhesives, with higher strength, greater durability, and less odor than Durobond. It is also useful for composite body panel repairs.

Loctite E-120HP Hysol Structural Epoxy, 400ml cartridge Part No. 3369 \$102.99

Loctite E-120HP Hysol Structural Epoxy, 200ml cartridge Part No. LT-29354 \$54.99

Loctite E-120HP Hysol Structural Epoxy, 50ml cartridge Part No. LT-29353 \$14.99

The **Loctite Dispenser Guns** are hand-held, manually operated dispensing guns designed for use with two-component adhesives such as Hysol epoxy. One size works with both 200ml and 400ml dual cartridges in 1:1, 2:1, and 4:1 mix ratios. The other size works with 50ml dual cartridges. The Mixing Nozzles (sold separately) are removable between jobs, so you can use just what you need and save the rest for another job.

Loctite Universal Dispensing Gun for 200ml and 400ml Part No. 3337..... \$259.99

Loctite Mixing Nozzles for 200 or 400ml, 10-pack Part No. 3412-001 \$17.49

Loctite Dispensing Gun for 50ml Part No. LT-98472 \$53.99

Loctite Mixing Nozzles for 50ml, 10-pack Part No. LT-98623 \$12.99

Fluid Film Penetrating Lubricant

Fluid Film is a unique, eco-friendly, penetrating spray lubricant and anti-corrosion protectant. The solvent-free woolwax (lanolin) formula does not dry out or become tacky. It sprays as a light penetrating oil and rapidly thickens into a light grease. It coats and protects against corrosion and galling, making it perfect for long-term storage as well as for protecting moving parts. It resists salt and salt water, which makes it a favorite of shipyards and plow truck fleets. We use it in the warehouse to prevent rust on uncoated metal parts. Use it as a dressing on vinyl, leather, and rubber seals too. 11.75 ounce (333g) aerosol can.

Fluid Film Lubricant Part No. 3412-200 ... \$11.99

HV-350 Flexible Adhesive

From Valco Cincinnati, the licensed manufacturer of Hylomar, comes **HV-350**, an amazingly flexible and versatile adhesive. Its elasticity makes it ideal for high-vibration environments, yet it cures hard enough to sand and paint. Repair fiberglass bodywork without promoting new cracks around the patch! Bonds to virtually any clean surface, porous or nonporous (great for bonding dissimilar materials). Seals out moisture, even when completely submerged (great for insulating electrical connectors). Excellent for bonding the edges of custom foam air filters. 3.35 ounce tube.

HV-350 Flexible Adhesive, 3.35 oz tube Part No. 3435-001 \$7.99

HV-350 Flexible Adhesive Part No. 3435-001

- Repair cracked fiberglass
- Insulate exposed wires
- Repair torn upholstery
- Attach new weatherstripping
- Bond air filter foam sheets
- Reinstall helmet molding

Würth Chemical Products

Once available only to professional shops, Würth Chemical Products are widely regarded as some of the best lubricants and cleaners available. These high-quality chemicals are so much more effective than the competition that you will use less to do each job, saving money over "no-name" products.

Brake & Parts Cleaner The highest quality brake cleaner available. The exclusive non-chlorinated formula quickly removes grease, oil, and brake dust, yet will not affect most rubber and plastics. Dries quickly and leaves no residue. Net weight 14 ounce aerosol can (17.5 fluid ounces) offers exceptional value.

Würth Brake & Parts Cleaner, 14 oz. aerosol can Part No. 3393-14 oz .. \$5.99

Rost Off Aerosol penetrating oil loosens the most stubborn rust. Unique canister design will spray in any position, even upside-down! Contains 98% active ingredient and only 2% propellant for maximum value. Silicone-free. 10.1 fluid ounce (500ml) aerosol can.

Würth Rost Off, 10 oz. aerosol can Part No. 3386-10 oz .. \$11.99

HHS-K Lubricant Sprays on as a lightweight penetrating oil, but thickens to a medium-viscosity, pressure-resistant synthetic grease. Originally formulated for door hinges, it works equally well on linkages and latches. 16.9 fluid ounce (500ml) aerosol can.

Würth HHS-K Lubricant, 16.9 oz. aerosol can Part No. 3435-002... \$24.99

Contact OL "Electrician in a can!" Saves hours of testing and troubleshooting. Cleans oxidation from electrical connections, but will not harm plastic electrical connectors. Keep a can in the tow vehicle and you won't waste time trying to get the trailer lights to work every spring! 6.8 fluid ounce (200ml) aerosol can.

Würth Contact OL, 6.8 oz. aerosol can Part No. 3387 \$23.99

Dielectric Grease Use on all of your electrical connections to prevent corrosion. Non-conductive, non-toxic, and non-flammable. 3 ounce (85 gram) tube.

Würth Dielectric Grease, 3 oz. tube Part No. 3311 \$28.99
