Beta Tools 910/58 Rotating Handle 3/8" Ratchet Driver

Beta Tools 910/58 Rotating Handle 3/8" Ratchet Driver, Part No. BT-009100884

This ratchet driver is a real time saver. The 3/8" square drive is compatible with any standard 3/8" socket or drive accessory. The reversible 52-tooth drive requires just 7 degrees of take-up. But if you're working in an area even tighter than that, just twist the handle like a screwdriver. The special gear mechanism inside will turn the ratchet drive when you twist the handle! Even better, when you twist the handle back to take another twist, the ratchet will turn again. You get two turns from each twist and recoil, without ever letting go of the handle. Great for quick spinning during assembly. Twist the handle for quick driving, then push the handle to deliver the final tightening torque. A retaining ball with a release button on the back of the ratchet head keeps your socket firmly in place. Chrome shaft with a black reversing dial and orange release button. The Beta orange molded BetaGrip handle has black rubberized inserts. Sockets sold separately.
