

Pegasus Part No. 3071 Performance Racing Spherical Bearings (Aurora PNB and PNB-G Series)

These spherical bearings provide excellent strength and durability. The ball is heat-treated and hard chrome plated alloy steel. The stainless steel race has a self-lubricating PTFE fabric lining bonded to it. These bearings are very resistant to loosening, even when subjected to the pounding they receive under racing conditions. They are available with plain races (to be retained with a circlip) or grooved races (for permanent staking into an assembly). Aurora PNB-T (plain) and PNB-TG (grooved) series.

Race: 17-4 PH Stainless steel (AMS 5643), heat treated.

Ball: Alloy steel, heat treated and hard chrome plated (heat-treated 440C stainless steel at manufacturer's option).

Lubrication: (AT3200) Self-lubricating PTFE liner. Qualified to SAE-AS81820 (formerly MIL-B-81820).

* Note: The "Grumman Groove" is designed for installations where the bearing will be permanently staked into the assembly using a press and a special anvil. If your installation uses a snap ring or circlip to hold the bearing in place, use the plain type.
